ENHANCE THE CONVENIENCE FACTOR IN
BATHROOMS WITH PRE-PROGRAMMABLE
TUBS, TOILETS AND MORE

WORDS _Kendra Jackson

NUMI 2.0 INTELLIGENT TOILET

With an unconventional shape and ambient illumination around the base and back, the Numi 2.0 takes kitting out the bathroom to another level. Its corresponding Kohler Konnect app can play music, preheat the seat, program sanitization and auto-flush using two water-efficient settings. Equipped with Amazon Alexa, the unit can also check weather, traffic and other news, all through voice-command, the app or internal sensors. kohler.ca

DANDY PLUS

For his first collaboration with Scavolini, Italian architect Fabio Novembre reimagined one of the brand's classic designs not only by softening its edges and adding colourful accents, but by updating it for a wireless world as well. The central feature of Dandy Plus (which also includes modules for the kitchen and living room) is its Task Bar with a built-in Amazon Alexa-synced speaker. The aluminum beam can be fitted with, among other accessories, power and USB sockets, shelves, towel racks and recessed LEDs. Recycled plastic handles in one of five fresh new hues — Coral Red, Mustard Yellow, Agave Blue, Prestige White or Slate Black — add a custom tailoring option. scavolini.com
